C90
ENGINEERING & CONSULTING

Shaping an Ethical World

Project and Tender Experience

Airport facilities, travel retail and high-value commercial spaces

About US

From architectural and structural design to project management

C90 is an integrated engineering firm specialising in the development, design and construction of high-impact commercial spaces:

- Airports
- Travel retail
- Hospitality
- Commercial fit-outs
- Food & Beverage

From tender consultancy to works management, an organisational model designed to eliminate fragmentation in large-scale roll-outs.

Shaping an Ethical World

Our Value

Shaping an ethical world. More than a tagline, it’s C90’s mindset.

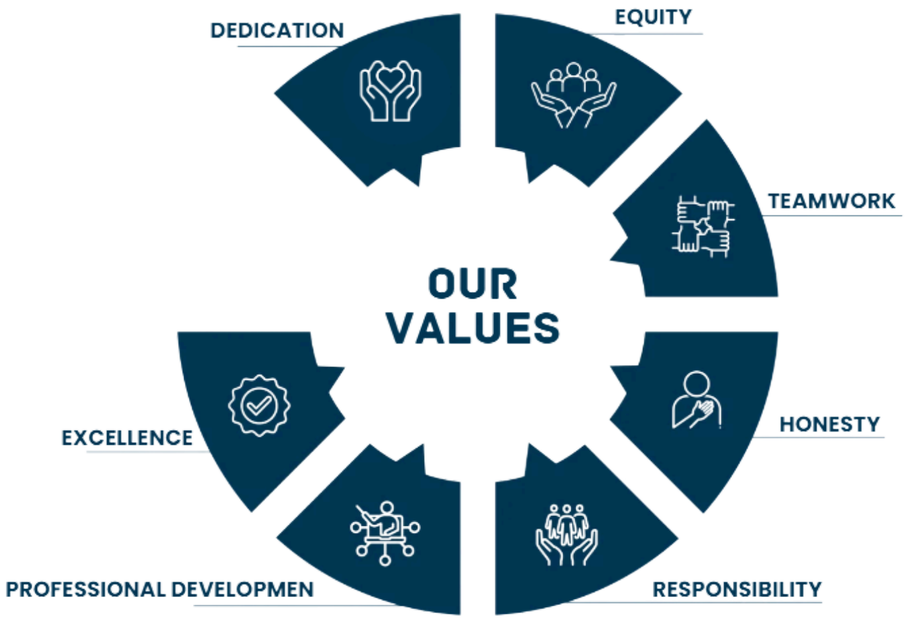

Committed to sustainability and ethical business, C90 serves real estate investment trusts, international companies, airports, aviation and handling industries, railway stations, and travel retailers.

With a focus on project management and integrated design, C90 leverages multidisciplinary expertise, technical skills, and strict time and cost control to coordinate all professionals involved, ensuring successful project execution.

Every concept we design starts from how it will be built, maintained and operated, not only how it will look. Functionality, durability and lifecycle cost are design inputs from day one, not afterthoughts.

Our Mission

Single point of contact

SATISFYING OUR CLIENTS

Is our top priorityl. C90 provides continuous and dedicated support from concept creation through to project completion.

HAVING A SINGLE POINT OF CONTACT

Who is an expert in problem solving and project management, and who coordinates the design and implementation of the intervention, helps ensure the project is completed on time and on budget.

OUR INTEGRATED DESIGN SOLUTIONS

Cover Architectural Design, Structural Works, Geotechnical, Civil Works, Electrical and Special Installations, Plumbing, HVAC, Fire Protection, Energy Efficiency, and Lighting.

DESIGNING FOR OPERATIONS

We test every material and layout choice against 24/7 passenger traffic, cleaning cycles, maintenance access and replacement costs, so the concept still performs after year five, not just on opening day.

Proven Expertise

The world of airports: our chosen field

DIFFERENT GUIDELINES FOR EACH AIRPORT

Italian and EU regulations, accessibility for people with reduced mobility, airport security and voluntary certifications (LEED, BREEAM In Use) make this sector one of the most complex in terms of regulation.

HIGH-VALUE SPACES

Spaces with high commercial value (VIP lounges, duty-free shops, premium areas and F&B outlets) where every day of delay results in significant financial losses.

OPERATIONS THAT NEVER STOP

Construction phasing isn't an execution detail, it's a concept design decision. Every layout we propose already accounts for how it will be built in stages, without disrupting terminal operations.

INTERNATIONAL CONTEXTS

Projects in Italy, Greece, Spain and Israel: differing local regulations, international stakeholders, and varying landlord timelines.

Our Services

INTEGRATED ENGINEERING

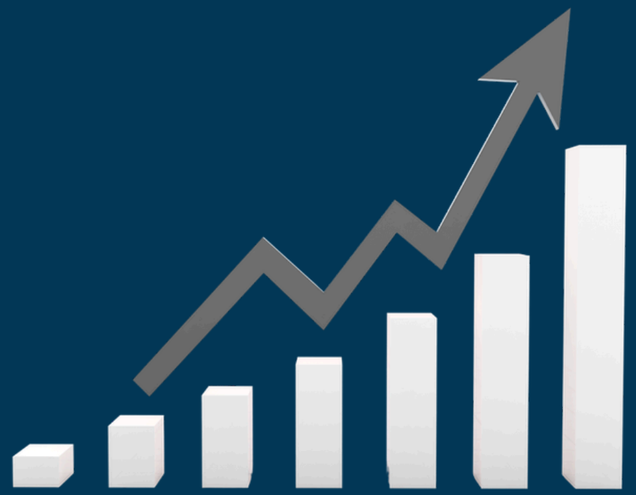

- Architectural & Structural Design
- Mechanical, Water & Firefighting Systems
- Electrical & Special Installations
- Energy Efficiency & Sustainability

PROJECT DELIVERY & COMPLIANCE

- Project Management
- Technical Tender Consulting
- Fire Prevention
- HSE Management

Our Procedure

Why our projects don’t fall behind schedule

A SINGLE PM ASSIGNED
The Business Developer transfers all order information to the PM, without any information being lost.

TECHNICAL BUSINESS UNIT IN PARALLEL
The technical team, duly appointed by the project manager, works with the aim of maintaining high standards of design and construction.

FEASIBILITY AND TENDERS
PTFE and Value Engineering: critical issues are identified in advance, thereby minimising problems during the implementation phase.

CONTINUOUS MONITORING
Constant monitoring of the schedule, costs and quality, with immediate corrective action.

TESTING
The same team that managed the project is seeing it through to completion: there is no handover midway through.

Experiences of Airport Projects

Design and engineering services for lounges, duty-free, retail and food & beverage spaces in international airports

EXPERIENCES OF AIRPORT PROJECTS

Plaza Premium First - FCO
